Webinar: Rooftop Solar: What You Need to Know

In this webinar, you'll hear from Nageen Rehman and from 2 homeowners about their solar experience. Here are more details about what to expect.....

Nageen Rehman is a Program Manager in the Environment & Climate Division in the City of Toronto, where she manages the Solar TO program. Previously, she worked in the renewable energy sector for over 8 years, developing projects both locally and in UK and US.

One of the City's Transform TO goals is to meet 50% of community-wide energy with renewable or low-carbon sources by 2030. [The Solar TO program](#) was developed to accelerate the uptake of solar in the community. Nageen's presentation will give a overview of the services offered to residents via the Solar TO program. She'll also describe the SolarTO Map, an interactive online mapping tool which enables residents and businesses to quickly estimate the rooftop solar potential of their buildings. The map generates an estimate of your system size, cost, savings, payback period and more.

Also invited (but not yet confirmed) is a representative of **Toronto Hydro** to

explain the application process for rooftop solar installations.

Attendees will also hear two short presentations from **local homeowners** who have recently installed solar panels on their roofs.

Most of this 90-minute session will be dedicated to answering your questions.

When: Monday, June 12, 2023 from 7:00pm to 8:30pm

Where: on Zoom (The link will be sent a few days before the event to all those that have registered)

Registration: Please register for this free webinar here:
